It is very important

to use DC fountain pump in public waterscape!

在公共水景中使用直流喷泉泵非常重要！

Imagine

Water and money are good servants, but bad masters.

水和金钱是忠仆，使用不当是祸首。

Imagine brilliant water column like blue lotus rising from the water, a pool of clear water — sweet, cool, & limpid, with gently sloping banks, & shaded on all sides by trees of many kinds — a group of children are playing in the fountain with pleased smile, but suddenly be struck down!

Most of the public commercial fountain are running in the 220V/380V electric environment. They represented that all the necessary safety measures had been taken.

220V and 380V are not safe voltage, no matter what safety measures they took, you will never sit on the side of the pool with the legs in the water, if you know the water is connected to a live 220V wire.

想象一下，蓝色的莲花一样的水柱从水面升起，一池水看起来如此清澈、甘甜、清凉，有缓坡的池边，四周绿树成荫，一群孩子在喷泉里开心地玩着笑着，却突然被电打倒了！

大部分公共商业喷泉都在220V / 380V的电气环境中运行。他们表示已经采取了所有必要的安全措施。

但是220V和380V都不是安全电压，无论采取什么样的安全措施，如果你知道水里连接着一根导电的220V电缆，你敢放心的坐在水池边吗？

A good pump is available 你得有个好泵

A good commercial water scape must be the perfect combination of water features designer, electrical engineer, construction engineer and capital.

Some good designers can capture behavior patterns in nature, creating things by incorporating the art of water, fog, and light to create complex and ever-changing water scape.

First things first, a good fountain pump is available for you.

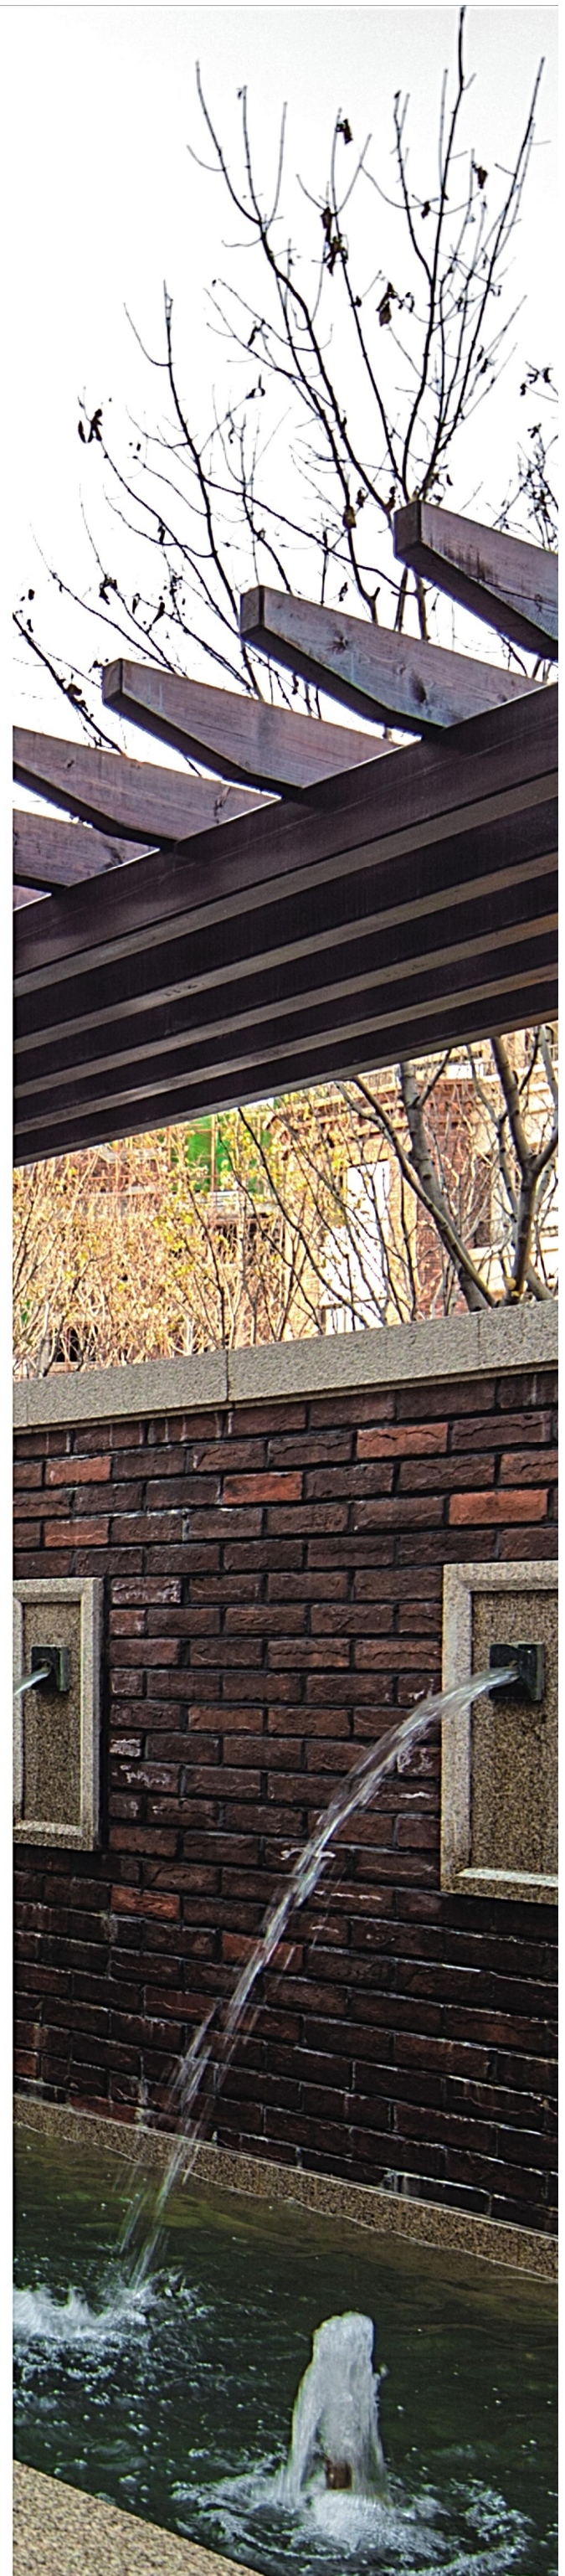

Please keep DC Fountain Pump in mind when you are designing water scape with light, color and motion.

一个好的商业水景，必然是水景设计师、电气工程师、建筑工程师和资本的完美结合。

一些优秀的设计师可以捕捉自然界的某些元素，通过融合水，雾和光的艺术来创造事物，创造出复杂而不断变化的水景。

前提是你得有个好泵。

当您在设计水景的灯光、颜色和运动时，请记住东彩喷泉泵，专做直流泵。
